

• • • • Bio: Dr. Eulian Roberts

Eulian is the **Managing Director of Qatar Science & Technology Park** and a Director of ANGLE Technology Limited, an international consulting, management and venture company that has been retained by the Qatar Foundation to develop, deliver and operate QSTP.

He has deep experience **developing knowledge-based companies, business incubators and science parks**, as well as regional technology policy, and research commercialisation. His sector experience includes biotechnology, environmental technology, energy, healthcare, software and telecommunications.

Highlights of Eulian's career include:

- Graduated from Imperial College with a BSc and PhD in 1986, and obtained an MBA three years later
- 1986: Institute of Plant Science Research in Cambridge, where he managed commercially funded research projects
- 1989: Scottish Enterprise, where he was responsible for developing and delivering a range of economic development initiatives as a Technology Development Manager
- 1993: Chief Executive of Stirling University Innovation Park Limited, where he established Forthright Innovation, a trading arm of the company to assist businesses in the processes of new product development.
- Managing Director of Coventry University Enterprises, responsible for developing and implementing strategies for maximising the commercial opportunities arising from the resources, expertise and facilities of the University.
- ANGLE Technology's Director of European Consulting and Management where he managed a wide range of short and long term assignments for national governments, research institutions and commercial clients
- 2004: Managing Director of QSTP, where he leads the strategy and management of the science park, which aims to develop Qatar's knowledge economy.
